

For Immediate release –

Kirsch Building Products LLC, Simi Valley, CA. introduces a novel extension to its line of roof underlayments. New Self-Adhered **Sharkskin Ultra SA**. This revolutionary new light weight peel and stick underlayment utilizes a high strength **ultra-bond** adhesive system engineered to eliminate the drawbacks of traditional peel and stick underlayment systems. Patent pending design includes the exceptional slip resistance as with the patented Sharkskin Comp and Sharkskin Ultra mechanically fastened underlayments. Perfect for any peel and stick application. Perfect for adhesive foam-set concrete/clay tile and metal panel applications. Surpasses requirements for adhesion per ASTM D-1970. No need to trowel adhesive to seal joints. The Sharkskin Ultra SA provides the best protection with the easiest handling. 12 month UV rated.

Sharkskin is the first synthetic underlayment to offer superior performance in all major aspects: Durability and toughness, protection from UV radiation, ease of handling, and slip resistance. When you get the Sharkskin advantage, you differentiate your business from your competitors and offer the best solution to your customers.
